The page addresses the practitioner, not the learner

STRUCTURAL

The whole "Ninety days" section, steps 01–07

This is the biggest issue on the page, and it isn't a one-line fix. The step cards are written in second person to the *practitioner* — "you receive," "you invite them," "what lands in your account" — with a legend splitting the page into "What your learner experiences" vs. "What you see and earn." That's a strong practitioner-recruitment pitch. But it sits at a URL and nav label ("Learner journey") that a real learner clicks expecting content addressed to *them*. Two ways to resolve it — pick one before any wording gets touched:

DIRECTION A — RECLASSIFY THE PAGE (LEAST REWORK)

Keep this content as-is — it's well written — but treat it as practitioner-side material. Fold it into the practitioner journey flow (or link it from there) and stop sending the public "Learner journey" nav item here. Give learners a separate, short page written to them that leads straight into the membership plans below.

DIRECTION B — REWRITE THE PAGE IN LEARNER VOICE (BIGGER LIFT)

Keep this URL as the real learner page. Rewrite each "LEARNER" card to speak to the learner directly and drop the purple "what you see and earn" column entirely (it belongs on the practitioner page). Worked example for Day 0:

– CURRENT (PRACTITIONER-VOICED)

They land on your link — From your Instagram bio. They see who you are, what you help with, and one clear next step — not a menu of seventeen services. They book, pay by UPI, and get a confirmation before they've closed the tab.

+ REWRITTEN (LEARNER-VOICED)

You find them where you already scroll — On their Instagram bio: who they are, what they help with, one clear next step. You book, pay by UPI, and get your confirmation before you've closed the tab.

Copy

The remaining 6 steps need the same treatment if Direction B is chosen — happy to draft all seven once you've picked a direction.

Trial banner contradicts itself

CRITICAL BUG

"Learner Membership Plans" section, trial banner

– CURRENT

⚡ 7-Day Free Trial Active: 14 days remaining

A 7-day trial can't have 14 days left. This looks like it was copied from the practitioner page's banner (which correctly reads "14-Day Free Trial Active: 14 days remaining") without updating one half.

IF THE LEARNER TRIAL IS REALLY 14 DAYS

+ REPLACEMENT

⚡ 14-Day Free Trial Active: 14 days remaining

Copy

IF THE LEARNER TRIAL IS REALLY 7 DAYS

+ REPLACEMENT

⚡ 7-Day Free Trial Active: 7 days remaining

Copy

Needs input: which trial length is correct for learners.

Closing CTA speaks to practitioners, not learners

MISMATCHED

Final section before the footer

– CURRENT HEADING

This is what "held" looks like as a product.

– CURRENT SUBTEXT

Ninety days, one link, three ways to earn – and nobody handed off to a stranger.

– CURRENT BUTTONS

Start your free practice space

Talk to a real human →

"Practice space" and "ways to earn" are practitioner language, closing a page meant to convert a learner into a membership. Compare this to the practitioner journey page, which ends on learner-facing buttons ("Choose a Learner Plan," "Find a Practitioner") — the two closing sections may simply need to trade places.

+ REPLACEMENT HEADING

This is what being held looks like.

Copy

+ REPLACEMENT SUBTEXT

Ninety days, one relationship, and support that actually remembers you.

Copy

+ REPLACEMENT BUTTONS

Copy

Choose Your Plan → #learner-membership-plans

Find a Practitioner → → /find-a-practitioner

Champion Plan's discount doesn't say how it relates to Advance's

AMBIGUOUS

Champion Plan card, bullets 2-3

- CURRENT (ADVANCE)

15% discount on all 1:1 practitioner sessions

- CURRENT (CHAMPION)

1 free 1:1 Session per month

25% discount on additional Sessions

A Champion subscriber can't tell if their 25% replaces Advance's 15%, or is a separate rate that only kicks in after the free session. Pick one and say so explicitly:

IF 25% IS SIMPLY CHAMPION'S FLAT RATE

+ REPLACEMENT

Copy

25% discount on all 1:1 practitioner sessions (after your free monthly session)

IF 25% ONLY APPLIES BEYOND THE FREE SESSION, REPLACING THE 15%

+ REPLACEMENT

Copy

25% discount on 1:1 sessions beyond your free monthly session – replaces the Advance 15% rate

Pricing steps look unintentional

VERIFY BEFORE SHIPPING

Beginner ₹51 → Advance ₹151 → Champion ₹1,500

- CURRENT, FOR REFERENCE

Beginner Plan: ₹51/month

Advance Plan: ₹151/month

Champion Plan: ₹1,500/month

Not a wording fix — a flag. The jump is 3x from Beginner to Advance, then roughly 10x into Champion, and ₹51 / ₹151 both read like placeholder-style figures next to a fairly loaded feature list (courses, unlimited circles, an AI companion, a "health record vault"). Please confirm these are the final, intended prices before this goes further.

"Health record vault" carries regulatory weight

COMPLIANCE-SENSITIVE

– CURRENT

Secure digital health record vault

"Health record" implies formal medical-record custodianship, which is a different regulatory bar than session notes or a wellness journal. I can't write the correct replacement without knowing what's actually stored — get this in front of Legal, then either keep the term (if it's accurate and compliant) or soften it, e.g. to something like a private history of sessions and reflections rather than a clinical record.

Needs input: what this feature actually stores, and whether "health record" is a claim the platform can legally stand behind.

Circle pricing example reads like a math error

WEAK WORDING

Step 04 (Week 2), "you invite them into the circle"

– CURRENT

Circle of 8 at ₹15,000 = ₹1,20,000 for six evenings

+ REPLACEMENT

Circle of 8 at ₹15,000/seat = ₹1,20,000 for six evenings

Copy

Without "/seat," ₹15,000 reads as the whole circle's price, which makes the "= ₹1,20,000" that follows look like a mistake instead of the correct per-seat multiplication.

Revenue stat isn't explained as a running total

WEAK WORDING

Step 07 (Day 90), "the loop closes"

– CURRENT

One learner became ₹2,500 → ₹17,500 → recurring

+ REPLACEMENT

One learner: ₹2,500 first session → ₹17,500 total after their first Circle → ₹799/month recurring

Copy

As written, ₹17,500 looks like a second one-off payment out of nowhere. It's actually a running total (₹2,500 session + a ₹15,000 Circle seat) — say so, and name the ₹799/month figure that's already sitting in the paragraph right above instead of leaving "recurring" unquantified.

Payout timing disagrees with the practitioner page

CONTRADICTION

Step 01 (Day 0) earnings stat, vs. the practitioner page's payout FAQ

– THIS PAGE

You receive ₹2,500 – settled to your bank in two days

– PRACTITIONER-JOURNEY PAGE, FAQ

All payments... settled directly to your bank account on a rolling 7-day basis.
[T+2 payouts are named separately as a Master Studio benefit]

This page shows every practitioner getting 2-day settlement; the practitioner page ties T+2 specifically to the Master Studio tier and describes a 7-day rolling settlement otherwise. Both pages need to state the same timing.

+ REPLACEMENT (ONCE CONFIRMED)

Copy

You receive ₹2,500 – settled to your bank on your plan's payout schedule

Needs input: the real payout timing per tier — then both pages should quote the identical schedule.

UI/UX & illustration notes

Not text swaps — for whoever owns visual design. Ranked roughly by impact.

1 Make the "who is this for" legend an actual filter

The page already has a legend — a blue dot for "What your learner experiences," a purple dot for "What you see and earn." Right now it's decorative. Make it interactive: clicking a dot dims the other column's cards. That gives a confused visitor (see item #1 above) a way to isolate the narrative meant for them, without waiting on a full content rewrite.

addresses the audience-mismatch finding

2 Add a persistent progress rail for the 90-day arc

Day 0 to Day 90 across 7 steps is a long scroll. A slim fixed rail (edge of screen) marking Day 0 / Day 30 / Day 60 / Day 90 with the reader's current position highlighted would reinforce the "journey" framing spatially, not just in the copy, and helps orient anyone who lands mid-scroll from a shared link.

3 Give the four AURA capabilities real icons, not bare numbers

"It listens," "it suggests," "it remembers," "it writes" currently ship as 01–04 with no visual differentiation. A simple line-icon per capability — a waveform/ear for listening, a small lightbulb for the suggested question, a linked-thread mark for cross-session memory, a pen/note for the aftermath — turns a text list into a scannable feature grid.

4 Visualize "streaks" and "milestones" instead of describing them

The Progress Milestones card talks about streaks and a milestone marker but shows neither —

it's a paragraph of text describing an inherently visual thing. A small calendar-heatmap or ring-progress graphic here would sell the feature far better than the sentence does.

5 Push the "Live AURA" demo card further — it's the best illustration on the page

The mock in-session card (suggestion chips, "Session 3 · 24:16," consent line) is genuinely effective — it's the one place the product feels real instead of described. Add a soft pulsing dot or waveform next to the session timestamp so "live" reads at a glance, not just from the label.

6 Show the "screenshot and send to a friend" moment

The copy claims learners quietly screenshot their progress view and send it to a friend — a concrete, visual claim that's never actually shown. A small phone-frame mockup of that progress view here would make the claim tangible and double as a light social-proof device, the way the AURA card already does for the session experience.

7 Carry the blue/purple color coding through to pricing and CTAs

Learner = blue, practitioner = purple is established early and works well. Right now that association resets once the page reaches the pricing cards and closing buttons. Keeping the same pairing there (learner-facing buttons in blue, any practitioner-facing element in purple) lets the color coding keep doing work for the rest of the page instead of only the timeline.
