6. Social proof 7. AURA privacy 8. Comparison table

Earnings calculator shows a raw debug note

CRITICAL BUG

"What you keep per month" → result panel

– LIVE ON THE SITE NOW

⚠ Commission / take-rate is CLIENT_SUPPLIED and currently shown as 0%. Confirm actual rate with the client before publishing.

Why: this is an internal placeholder that shipped to production. Every visitor doing the earnings math sees a note telling them the number isn't confirmed. Pull it today regardless of which replacement below gets used.

OPTION A – COMMISSION IS 0% ON EVERY PLAN

+ REPLACEMENT

OpenHand charges 0% commission – you keep everything above your monthly plan fee.

Copy

OPTION B – COMMISSION DIFFERS BY TIER

+ REPLACEMENT (FILL IN X / Y)

OpenHand commission: 0% on Master Studio • [X]% on Growth • [Y]% on Starter – already subtracted above.

Copy

Needs input: which option is actually true. This calculator, the Master Studio card (#2), and the FAQ answer (#3) all need to agree — right now they don't.

Master Studio implies it's the only 0%-commission tier

CONTRADICTION

Master Studio plan card, bullet 2

– CURRENT

0% platform commission on initial earnings & direct T+2 bank payouts

This reads as a Master-exclusive perk, but the FAQ (#3) states 0% commission for everyone. One of the two is wrong.

IF 0% IS UNIVERSAL (RECOMMENDED – MATCHES THE FAQ AND THE HERO PROMISE "KEEP WHAT YOU EARN")

+ REPLACEMENT BULLET

Copy

Fastest payouts: direct T+2 bank settlement

+ ADD ONCE, ABOVE ALL THREE CARDS

Copy

All plans: 0% commission on your session & Circle earnings.

IF MASTER REALLY IS THE ONLY 0% TIER

+ STARTER CARD, NEW BULLET (FILL IN X)

Copy

[X]% commission on session & Circle earnings

+ GROWTH CARD, NEW BULLET (FILL IN Y)

Copy

[Y]% commission on session & Circle earnings

FAQ commission answer contradicts the Master Studio card

CONTRADICTION

FAQ → "What take-rate or commission does OpenHand charge?"

– CURRENT

OpenHand charges 0% platform commission on your initial earnings. Tiered platform subscription plans (Starter ₹999, Growth ₹2,999, Master ₹5,999) cover platform hosting, AURA intelligence, and payment gateway infrastructure with direct T+2 bank payouts.

IF 0% IS UNIVERSAL

+ REPLACEMENT (ONLY TIGHTENS "INITIAL")

Copy

OpenHand charges 0% platform commission on your earnings. Tiered platform subscription plans (Starter ₹999, Growth ₹2,999, Master ₹5,999) cover platform hosting, AURA intelligence, and payment gateway infrastructure with direct T+2 bank payouts.

"Initial" currently reads like the 0% is a temporary intro rate — dropping it removes that ambiguity.

IF COMMISSION IS TIERED (FILL IN X / Y)

+ REPLACEMENT

Copy

OpenHand charges 0% platform commission on Master Studio. Starter and Growth plans charge [X]% and [Y]% respectively on session and Circle earnings, on top of the monthly subscription. All plans pay out via Razorpay – Master Studio settles T+2, other plans on a rolling 7-day basis.

Closing CTA switches to the learner audience

WEAK / MISMATCHED

Final section before the footer

- CURRENT HEADING

Start your personal care journey today.

- CURRENT SUBTEXT

Subscribe to an OpenHand learner plan or find a practitioner to get started.
Switch or cancel anytime.

- CURRENT BUTTONS

Choose a Learner Plan → /pricing
Find a Practitioner → → /find-a-practitioner

This is the *practitioner* journey page. Ending it on learner-facing buttons hands the visitor an exit right at the moment they were closest to subscribing.

+ REPLACEMENT HEADING

Ready to build your practice?

Copy

+ REPLACEMENT SUBTEXT

Start free on OpenHand, publish your first offer, and upgrade to Growth or Master Studio whenever you're ready to scale. No commission, no lock-in.

Copy

+ REPLACEMENT BUTTONS

Start Free – No Card Required → practitioner sign-up route
Compare Plans → #practitioner-platform-plans

Copy

Needs input: the real practitioner sign-up URL — the footer nav lists "Onboarding" as its own link separate from this page, so confirm which route the primary button should point to.

The page never actually shows a "journey"

MISSING CONTENT

Insert between the hero and "Practitioner Platform Subscriptions"

The page is titled "Practitioner Journey & Pricing" but jumps straight to pricing. A first-time visitor gets no onboarding context before being asked to pick a plan.

+ NEW SECTION — EYEBROW

How it works

Copy

+ NEW SECTION — HEADING

Your journey on OpenHand

Copy

+ NEW SECTION — SUBHEADING

Copy

From sign-up to your first booking.

+ STEP 1

Copy

Sign up free – Create your practitioner profile in minutes, no card required.

+ STEP 2

Copy

Get listed – Appear in the practitioner directory with your own booking link.

+ STEP 3

Copy

Publish your offer – List a 1:1 Session or Circle at the price you set.

+ STEP 4

Copy

Get paid directly – Payments settle straight to your bank via Razorpay.

Needs input: verification requirements for step 2, and whether step 4's payout timing should be spelled out per plan (Starter/Growth settle on a rolling 7-day basis, Master Studio on T+2, per the FAQ) — kept generic here on purpose until confirmed.

Trust signal is buried in the footer

WEAK PLACEMENT

Currently: site footer only

– CURRENT LOCATION

1,200+ Practitioners Active on openhand.live
(footer – below the fold, after the visitor has already decided)

+ ADD NEAR THE HERO, BELOW THE SUBHEADING OR BESIDE THE TRIAL BANNER

Copy

Trusted by 1,200+ practitioners across India

Needs input: confirm the 1,200+ figure is current before promoting it to a high-visibility spot — a stale number does more damage near the top of the page than in the footer.

AURA's "consent-first" claim is never explained

MISSING CONTENT

Hero mentions it once; add a new FAQ entry

– ONLY MENTION ON THE PAGE

...and use AURA – consent-first session AI – to hold space better.

AURA is a headline selling point in the plans and the comparison table, but nothing on the page says what "consent-first" actually means for a client's session data — the one thing a therapist or coach

evaluating this platform will want to know.

+ NEW FAQ QUESTION

Copy

How does AURA handle client consent and data privacy?

Do not draft this answer from this document. I don't know OpenHand's actual consent flow, storage, or retention behavior, so I'm flagging the gap only — get the real answer from whoever owns AURA's architecture (Product/Legal). Publishing an invented privacy claim here is a compliance risk, not just a copy issue.

Comparison table reads as a stacked strawman

WEAK WORDING

"Why learners choose OpenHand membership" table – 3 rows

– CURRENT, REPEATED ACROSS PERSONAL AI COMPANION (AURA), DAILY REFLECTION & MOOD CHECK-INS, AND FAMILY ACCOUNT SHARING ROWS

- × N/A (Standalone Pay-As-You-Go)
- × N/A (Standard Apps)
- × N/A (Traditional Offline Care)

+ REPLACEMENT, SAME 3 ROWS

Copy

- × Not offered

"N/A" reads ambiguous (not applicable vs. genuinely absent) and a wall of it across every row of three competitor columns reads as one-sided. "Not offered" is more accurate for features that are proprietary to OpenHand, and softens the comparison without losing the point.
